### About This Game

#### **Beyond the Horizon**

From darkness to light.

Travel through 11 zones of relaxation.

Visit as often as you like.

This virtual reality (VR) experience, allows you to continuously traverse a mysterious friendly world on a unique virtual platform that you control with your body.

Eleven (plus one) unique zones support a restful relaxing state, giving you time for reflection and introspection.

With your body movement you control your horizontal direction and speed. With a controller, you can also explore above and below, finding a variety of places to enjoy the alien landscape.

We are also exploring the use of voice to control the platform.

'Up', 'level', 'down', controls your vertical movement.

'Stop' will allow you to hold the platform in its current position. Pull out your yoga mat, or do Tai Chi in front of the waterfall.

'Go' will start the platform moving again.

only thing u could ask for is quite possibly an automatic mod load order thing for more stability  
. If you love retro styled games, and quirky humor, get Luke Sidewalker!

In this game you make your way through the crowds to face a unique stage boss the end of every level.

With easy to obtain achievements and trading cards, it is worth picking this game up for less than a dollar.

Heck, get the Bros Bundle to get all their games!!.. About 6 hrs of story content for 3€, absolutely fair.

Story is very good, but theres nearly nothing visual about this "Visual-Novel".

So think about this more as a pure novel.. Hacker evolution is NOT a hacking game, but more something like: You must dig into the servers to find new servers, clues and other things that will help you. Something between exploration and detective. This game is more about thinking ahead. Stats like trace will be carried with you to the next level, so if you finish a level with 99% trace, it will be the same in next level. For people who like to play easy games this game is really frustrating, but for those which like challenges this is a perfect game.

Pros:

- + Great Soundtrack
- + Good Concept
- + Great UI (BUT it will not fit everyone)
- + Lots of fun if you like challenges
- + Great Story

Cons:

- Hardcore for some players (you have to restart whole game if you screw something up). Oh. My. God. Not only is this game fun, it's one of the most fun I had with my friends in a while! Basically, it's real-time Worms without the strategy. The gameplay is solid for the most part. It's kinda difficult and slow to navigate on land (even with the added jump and roll abilities) but what really makes this game fun is the jetpack flying. It's amazingly satisfying when a shot lands on one of your friends zipping and zooming around the map! The game doesn't look like much, but it's so much fun for just a buck. The cheap art style gives this game a certain charm too. I'd really recommend this game to anyone who has friends and a couple of xbox controllers!. Not worth \$1. the game makes you move on a track, you have no freedom. the spells are boring, the animations are basic, the gameplay is unchallenging. Why would a consumer pay for this even in early access when they can have the same game with better quality and more roaming freedom in spell caster? Hopefully they add the freedom to move around more. being on a track is one of the most boring gameplay experiences imo.. it's scary if you have your volume really high, otherwise it's a kids gaem. If you are a new player and aren't prepared to shell out money to be on par with players that have been around for a long amount of time, this game is not for you.

If you are returning from another site, such as y8 or Kongregate, you won't be able to transfer your account progress, so read the above excerpt.

for some reason my colors mess up when trying to play any of the kings quest games on my computer...does anyone know how to fix this problem. I paid \u20ac0.50 for a subpar wallpaper:

[All because the dev didn't bother about testing the game on AMD GPUs... and probably never will.](#)

[10/10 would refund again.](#)

[Don't waste your money if you have an AMD GPU, or an older Intel one.. Great game!](#)

[The controls are amazing and the graphics!](#)

[This is what i call a game!. Not bad, but not one of my favorites. I'd still recommend it, but maybe only if it's on sale.. I have fond memories of this game so I'm probably pretty biased. But it's definitely one of my favorite RTS games of all time. Highly recommend to anyone and everyone.. This is most definitely one of the best VR games out there right now.](#)

[Pros:](#)

[- Awesome co-op experience](#)

[- Runs great, looks great](#)

[Cons:](#)

[- I found it difficult to properly aim with grenades. One of the best RPG maker games i've played. The main character's personality is really off putting but if you ignore that everything else is great.. Bought this because of the promise of an update for RPG Maker MV. Still no word of the update. Can not recommend until this is provided as promised.. If you like point-click adventures, then you'll almost certainly like this. I don't like that genre particularly, but I got this because having played the demo for Isoland 1, I had to buy the full version of that. And I liked it so much that this was inevitable.](#)

[Like the first one, this is definitely worth it for the price. The slightly surreal atmosphere is even better here, as is the artwork.](#)

[I found I got stuck in quite a few places, which can get frustrating. But finished without using any guides simply by stopping playing for a while and returning to it later when I'd forgotten what I'd tried and what I hadn't.](#)

[One puzzle I had to brute-force, and I'm still not sure where the actual solution is. So I'll definitely replay it just to find that.](#)

[It's the kind of game you can come back to in a year or so and replay with a kind of uncanny, haunting feeling that you are suddenly immersed in something vaguely familiar, and yet still quite puzzling. I look forward to that feeling.. This is actually a very tough game to play. The controls are very simple and by level 11 you already know the full game, its just a case of completing the difficult levels. If you dont like rage games, dont play this. Music is very good also!](#)

[I'd give it a 8/10](#)
