Excellent and whimsical pathfinding puzzler. Also a rare case of a Greenlight project delivering exactly what they promised in a timely and functional manner. Runs great on my Mint 7.2, low VRAM computer.. If you played The Fruit of Grisaia, then bought the Michiru spin-off, don't expect to bawl your eyes out like many others have. This is a much more light hearted game. If you liked the long common route or part 1 of the spin off (assuming you are reading this because you are wondering to buy part 2 after finishing part 1), then you will enjoy this for it's little skits and not so serious story.

Even though this is a spin-off, some of the characters from the sequel of the main series show up, but knowing who they are is what all really matters, so it's not a terribly huge spoiler alert. Watching all of the anime adaptations should be more than enough.

Like The Fruit of Grisaia, you have the choice of either choosing to go windowed mode, which you can't customize, or full screen. I would rather have the windowed mode to be the same size as in Grisaia and not the overly huge screen that has little difference from full screen.

Pressing F12 (default minimize and screenshot button) and then another regular key still makes your game take a screenshot until you restart the game.

Michiruisbestgirl/10. This...is...MADNESS...!. It seemed promising when under development and now I've finally gotten around to it I'm left with a bad taste of disappointment in every department.

The most important flaws are rubbish controls--unresponsive with a non-variable jump height, so you will always be jumping the same height and the physics are terrible for it making it feel like some awful low-gravity moon jump. With the animations seeming to have missing frames and lack of good indicators, you're never sure how well you're doing against an enemy until it dies. Everything is so terrible in this department, it feels so sluggish you'd think the inputs were delayed and lagging.

When it comes to sound, the only noticeable thing is the terrible voice acting with dialogue that can't be skipped so you're forced to listen to the stale, emotionless characters that don't even seem to try to get you to care about what's going on. Bad voice acting exists in a lot of things, yes, but when there are no means to skip or speed up the dialogue, it draws extra attention itself and it just seems to get worse each time it happens.

If the controls weren't so rubbish, I might have given game more time, but the terrible voice-acting that I couldn't skip really put me off. There's quite a bit of dialogue in the beginning which I'd have to repeat each time I died because of not having a clear indication of whether or not the enemy I fought was near death. It's annoying how terrible it is.

Don't even take a chance on this one. It's not a fun experience at all; it's a mess.. It seems like a neat idea, but switching between 7 characters is actually kind of awkward.

Good work steam.

Best regards,

Mineirinho ultra adventures fan.. I only just downloaded this because I love science fiction, RPGs, and exploration in video games. So far this game looks very promising, however the difficulty level is crazy-high for battles. Enemies can destroy you with two hits. Aside from the difficulty level, the size of the planets is rather small too. Some things that I really like about this game so far are the vague story that hints at a greater mystery and plot and the impressive level of choice. In the very beginning of the game you are told to go do something for your creator, however you can deny him and go explore the universe. I thought that was a pretty nice touch. Aside from the gameplay and level design, the music is a mixed bag. I like the ambient music in the game because it adds a lot to the dark atmosphere, however it loops too quickly and becomes irritating. I would like to keep playing this game and see what it has to offer, but I keep finding myself selectively battling because my resources are running low and battles are unfair. Overall I am happy with my purchase of this game so far. My main recommendations are to focus more on memorable music with longer tracks that are distinguishable in the game and not generic. Then lower the difficulty to the point that the battles are not unfair and the player can actually grind without using a ton of health potions. If those issues are fixed then I would focus on making the planets larger and more explorable. That is obviously easier said than done, so the music and difficulty lowering should be top priority. This truly is a unique and ambitious game. I just hope it keeps improving and that people will take notice and buy it when it is finally finished.. This game is poorly made.

Looks bad, handles bad and is in dire need of a proofreading.

The music is decent, but that's about the only positive thing I can say.

This was a waste of time and money, so I'll be refunding it.. This game will not play well or not at all. It is somehow not able to connect to needed servers.. The game does not work as it should! Intro is messing up the screen and half-freezing. Need to alt-tab out of it and back in to it to be able to continue, The game menu is very ugly and not working correctly! I don't understand why I bought this game! I have not been able to even start a game! Reading on forum shows this problem is present for a while. so.. why do you keep selling this game if it does not work correctly???? A great experience...highly recommend!. Despite the fact that it wasn't create developer this is one of the best looking bullet hell games on Steam,also it's soundtrack,controls and

bullet patterns are above average as well.
