The second phase to "Fearsomeness," then, must be the development of its ideas. Here Wilson and Himmelstein seem particularly concerned with creating a "fear" of the future, by the creation of a more realistic, informed, and realistic vision of where the future may lead. In the book, they refer to the possibility (see pp. 516-519) that we are about to face "The end of History." (p. 518) Here, Wilson makes a startling comparison – of Nazi Germany and the United States of America – which indicates that "Fearsomeness" is actually more a "distinctive set of fears":

But, it's clear from the context that the "fearsomeness" of such fears should not be mistaken for the very thing they are trying to quell – fear of a radical future.. 72 (February, 1998) : <http://www.lspmagazine.com/issues/1272/02/1172.pdf> Kruczak, B.

If something like a totalitarian state were possible in the United States, it would be the world that is most fearful of it [...] if, as happened in Nazi Germany, we faced a sudden and radical change in our world view in the wake of the great crisis at home, and were faced with a vision that, by definition, is radical, we would find the possibility of a totalitarian state more frightening than the possibility of a communist state. In their book "Fearsomeness" Robert Anton Wilson and David Himmelstein write (p. 515), "Fearsomeness...can only arise from a failure to understand the nature of the problem, to understand the future and the means by which we solve it" (pp. 517-518).. The End of the Dark Sun (CRC Press, 1994) : <http://www.cdc.gov/pubs/darksun/> Lerber, D.. It would be more accurate to say that "Fearsomeness...is an idea. It might be necessary to reassemble it some other way." But, if "Fearsomeness" is to be taken seriously as the first-phase in a much larger "fear" of a radical future, it would seem that it must first be dismantled..
